Qualtrics

RE: Software Engineering Intern, Reston, VA

Dear Hiring Manager,

I was excited to learn of the Software Engineer Intern opportunity with Qualtrics and wanted to contact you in hopes of your consideration.

After doing some research on Qualtrics, I found that the company requirements match my field of study and interest. Furthermore, the toolset that Qualtrics is using also fits my knowledge and skills. I have had my hands-on full-stack web development, cloud deployment, object-oriented design, software development life cycle, and real-time communication using Socket. Thus, I believe that Qualtrics is the best option for me to contribute my knowledge and efforts to the company, and to have a chance to learn and improve my skills.

I will bring value to your organization through my technical skills and experiences. I have not only a strong knowledge of software development specified in web applications but also a good foundation in data structure and algorithms. I have contributed significantly to technical team projects through my collaborative efforts, employing collaboration and organization abilities. The technical projects I have been working on prove my problem-solving skills and my will of learning new technologies and adapting to the rapid change of software development. Furthermore, some of the technologies that I used for this project are also being used by Qualtrics. That, again, demonstrates my interests and qualification in Qualtrics.

One of the proudest technical projects I have done is a full-stack eCommerce website. It is a web application that allows users to sell or buy products. It has a server written in Node.js and Typescript, while the user interface is implemented using React. During this project, I have learned how to use PostgreSQL to store data permanently and create RESTful API to communicate with the front-end. Besides that, I also learned unit testing as well as how to deploy the web app into the cloud using AWS.

As my attached resume demonstrates, I offer the communication qualifications and knowledge that you require in a new Software Engineer Intern, along with an eagerness to learn. I would appreciate a formal interview to discuss the possibility of joining Qualtrics. I look forward to hearing from you at your earliest convenience.

Sincerely,
Nhat Le
