Office Depot

RE: Full Stack Web Developer Intern - REMOTE

Dear Hiring Manager,

I was excited to learn of the Full Stack Web Developer Intern opportunity with Office Depot and wanted to contact you in hopes of your consideration.

After doing some research on Office Depot, I found that the company requirements match my field of study and interest. Furthermore, the toolset that Office Depot is using also fits my knowledge and skills. I have had my hands-on full-stack web development, cloud deployment, object-oriented design, software development life cycle, and real-time communication using Socket. Thus, I believe that Office Depot is the best option for me to contribute my knowledge and efforts to the company, and to have a chance to learn and improve my skills.

I will bring value to your organization through my technical skills and experiences. I have not only a strong knowledge of software development specified in web applications but also a good foundation in data structure and algorithms. I have contributed significantly to technical team projects through my collaborative efforts, employing collaboration and organization abilities. The technical projects I have been working on prove my problem-solving skills and my will of learning new technologies and adapting to the rapid change of software development. Furthermore, some of the technologies that I used for this project are also being used by Office Depot. That, again, demonstrates my interests and qualification in Office Depot.

One of the proudest technical projects I have done is a full-stack eCommerce website. It is a web application that allows users to sell or buy products. It has a server written in Node.js and Typescript, while the user interface is implemented using React. During this project, I have learned how to use PostgreSQL to store data permanently and create RESTful API to communicate with the front-end. Besides that, I also learned unit testing as well as how to deploy the web app into the cloud using AWS.

As my attached resume demonstrates, I offer the communication qualifications and knowledge that you require in a new Full Stack Web Developer Intern, along with an eagerness to learn. I would appreciate a formal interview to discuss the possibility of joining Office Depot. I look forward to hearing from you at your earliest convenience.

Sincerely,  
Nhat Le
